Reports of the death of reading are greatly exaggeratedDo you worry that you've lost patience for anything longer than a tweet? If so, you're not alone. Digital-age pundits warn that as our appetite for books dwindles, so too do the virtues in which printed, bound objects once trained us: the willpower to focus on a sustained argument, the curiosity to look beyond the day's news, the willingness to be alone. The shelves of the world's great libraries, though, tell a more complicated story. Examining the wear and tear on the books that they contain, English professor Leah Price finds scant evidence that a golden age of reading ever existed. From the dawn of mass literacy to the invention of the paperback, most readers already skimmed and multitasked. Print-era doctors even forbade the very same silent absorption now recommended as a cure for electronic addictions. The evidence that books are dying proves even scarcer. In encounters with librarians, booksellers and activists who are reinventing old ways of reading, Price offers fresh hope to bibliophiles and literature lovers alike..

we talk stuff free listening on soundcloud

May 4th, 2020 - jesse coder and matt guion of extremely minor internet quasi relevance talk about whatever stuff catches their and your fancy located in an undercover facility s 20 tracks 47 followers stream tracks and playlists from we talk stuff on your desktop or mobile device
