"Über den Autor und weitere Mitwirkende José Quero-Garcia is a permanent researcher for INRA-Bordeaux, France. The focus of his team A3C (Adaptation du Cerisier au Changement Climatique) is to study the adaptation of the sweet cherry to climate changes, with a special emphasis on phenology-related traits as well as fruit quality, and in particular, tolerance to rain-induced cracking. He has been the Chair of COST Action FA1104 for the sustainable production of high-quality cherries in the European market since 2012. A. lezzoni is at Michigan State University. Joanna Pulawska is at the Research Institute of Horticulture, Poland. Gregory Lang is at Michigan State University."
