"Críticas **School Library Journal Series Made Simple**" "These sprightly biography anthologies spotlight five women whose curiosity and determination led them to break barriers and change perceptions. QR codes support information relayed in time lines, archive photos, reflective questions, sidebars, and pull quotes. The codes are used to their very best effect, sending readers to news reports, archival video, websites, TEDx talks, and even a webcomic. Each link is listed in the backmatter. The five or six activities per book range from simple observation to rather involved projects and forgo detailed instructions, instead encouraging readers to make choices and assemble materials and create their own challenges. Engineers is a standout for showcasing little-known stories like water safety pioneer Ellen Swallow Richards, while Programmers has the best activities and uses real programming tools. **VERDICT: A holistic approach incorporating personal stories, history, and STEM content.**" "A Mighty Girl Weekly Round Up "This girl-empowering STEM series introduces aspiring young scientists to a variety of career fields through the stories of groundbreaking women who made their mark in four

disciplines: ?Paleontology, ?Space Exploration, ?Computer Programming, and?Engineering. Each Gutsy Girls book introduces five remarkable role models, telling each woman's story in an engaging chapter-length biography filled with full-color photos, artwork, timelines, and sidebars full of fun facts. Hands-on 'field assignments' encouraging experimentation and critical thinking are interspersed throughout the books, including ones focused on building a space rover, preparing specimens, and designing a web page. **These fascinating books' combination of women's history and STEM activities will encourage young readers to imagine themselves as the gutsy scientists of the future. Ages: 8 to 11"** Reseña del editor **Hands-on space science projects help launch kids ages 8 to 11 into learning about fearless female astronauts who broke barriers across space and gender in this full-color book full of real-world connections!**Do you dream of going into space? Do you wonder what it's like on the moon? In ***Gutsy Girls Go for Science: Astronauts with STEM Projects for Kids***, readers ages 8 through 11 explore the lives of some of the world's most amazing female astronauts, including Bonnie Dunbar, Sally Ride, Mae Jemison, Sunita

Williams, and Serena Auñón-Chancellor?all pioneers in the field of space exploration. Their hard work and dedication to science and experimentation gave the world much new knowledge about space, biology, and more. These brave women took risks and pushed the limits of what we know about life in space.? Through hands-on STEM projects such as designing and building space rovers, rockets, and even a model of the International Space Station using inexpensive and easy-to-find supplies, kids gain critical thinking skills just like the ones necessary to succeed in space. ? Essential questions, cool facts about female scientists, and links to online resources all reinforce high-level learning. ? Using a fun narrative style, engaging illustrations combined with photography, fascinating facts, essential questions, and hands-on projects, this book deepens readers? creative thinking skills. About the **Gutsy Girls Go for Science** set and **Nomad Press** Astronauts is part of a set of four **Gutsy Girls Go for Science** books that explore career connections for young scientists. The other titles in this series include *Paleontologists*, *Engineers*, and *Programmers*. Nomad Press books in the **Gutsy Girls Go for Science** series integrate content with

participation, encouraging readers to engage in student-directed learning. Combining content with inquiry-based projects stimulates learning and makes it active and alive. Nomad's unique approach simultaneously grounds kids in factual knowledge while allowing them the space to be curious, creative, and critical thinkers. All books are leveled for Guided Reading level and Lexile and align with Common Core State Standards and National Curriculum Standards for Social Studies. All titles are available in paperback, hardcover, and ebook formats. Biografía del autor **Alicia Z. Klepeis** is the author of more than 70 nonfiction and fiction books, including ***Explore Makerspace!***, ***The Renaissance Inventors***, and ***The Renaissance Explorers*** from Nomad Press. She has also written more than 100 articles in magazines such as **National Geographic Kids** and **FACES**. She lives with her family in Hamilton, New York. **Shululu** (Hui Li) has always been driven by curiosity. She received a PhD in computational chemistry from the University of Chicago and is the illustrator of the **Physical Science for Kids** set of nonfiction picture books from Nomad Press. She is devoted to bringing joy and science to young readers through fun illustrations! She lives with her husband in New York, New

York."
