Commodity risk management has become an integral part of any business operating in India. This book covers almost all commodity types traded in India as well as in international commodity exchanges. It incorporates pricing and valuation of these commodities by taking into consideration factors influencing each and every commodity types. This book documents case studies involving important commodity price manipulations and frauds in commodity derivatives trading. Each of these cases has been analyzed in detail along with the role of the commodity market regulators in curbing manipulations/fraud to maintain market integrity. The book is intended for the postgraduate students of Management and Finance.
