"Pressestimmen A compelling warning ... It is hard to disagree with this advice from such a well-informed friend of the west (Martin Wolf Financial Times)We should all think of it as the cold shower that is urgently needed to revive the West (Fareed Zakaria, author of 'The Post-American World')It's a powerful, disputatious book . . . It's not comfortable reading, and it wasn't meant to be (Paul Kennedy, Director of International Security Studies and Professor of History at Yale University)Kishore Mahbubani brings unrivaled experience and insight into strategizing where the West goes from here. A book that truly speaks to our tumultuous times (Ian Bremmer, President of Eurasia Group)In the longer view, America's - and before that Europe's - dominance may come to be seen as a short aberration and the rise of China and other Asian nations as simply a reversion to the natural order of things. That at least is the key point of a provocatively titled book, Has the West Lost It?, by Kishore Mahbubani, a Singaporean academic and former diplomat. As many in America and Europe contemplate the dramatic changes to their world in the past few years, it's been getting a lot of attention. (Gerard Baker The Times) Klappentext The West's two-century epoch as global powerhouse is at an end. A new world order, with China and India as the strongest economies, dawns. How will the West react to its new status of superpower in decline? In Kishore Mahbubani's timely polemic, he argues passionately that the West can no longer presume to impose its ideology on the world, and crucially, that it must stop seeking to intervene, politically and militarily, in the affairs of other nations. He examines the West's greatest follies of recent times: the humiliation of Russia at the end of the Cold War, which led to the rise of Putin, and the invasion of Iraq after 9/11, which destabilised the Middle East. Yet, he argues, essential to future world peace are the Western constructs of democracy and reason, which it must continue to promote, by diplomacy rather than force, via multilateral institutions of global governance such as the UN. Only by recognising its changing status, and seeking to influence rather than dominate, he warns, can the West continue to play a key geopolitical role.In this thought-provoking and original intervention, drawing on his own experience in international affairs, Mahbubani examines Western hubris with an outsider's critical eye, and offers a new vision of our future world.
