"Críticas '? an excellent text ? This is a good book presenting basic science clearly and constructively for junior anaesthetists preparing for speciality examinations (FRCA).' British Medical Association Programme and Award Winners 2016 Reseña del editor This comprehensively illustrated guide covers the Primary FRCA examination physiology syllabus, providing an essential 'one-stop' resource for trainee anaesthetists. The book is packed with easily understood, up-to-date and clinically relevant material presented in a question-and-answer format. 'Clinical relevance' boxes enable the reader to translate the physiological concepts to clinical practice. Descripción del libro This comprehensively illustrated guide covers the Primary FRCA examination physiology syllabus, providing an essential 'one-stop' resource for trainee anaesthetists. The book is packed with easily understood, up-to-date and clinically relevant material presented in a question-and-answer format. 'Clinical relevance' boxes enable the reader to translate the physiological concepts to clinical practice. Biografía del autor David Chambers is a Specialty Registrar in the North West School of Anaesthesia, Manchester, UK. Christopher Huang is Professor of Cell Physiology and Fellow and Director of Medical Studies at Murray Edwards College, University of Cambridge, UK. Gareth Matthews is Translational Medicine and Therapeutics Research Fellow at the School of Clinical Medicine and Physiological Laboratory, University of Cambridge, UK."
