Now a major film starring Yara Shahidi and Charles Melton ***The New York Times*** bestselling love story from **Nicola Yoon, author of *Everything, Everything*.****Natasha:** I'm a girl who believes in science and facts. Not fate. Not destiny. Or dreams that will never come true. I'm definitely not the kind of girl who meets a cute boy on a crowded New York City street and falls in love with him. Not when my family is twelve hours away from being deported to Jamaica. Falling in love with him won't be my story.**Daniel:** I've always been the good son, the good student, living up to my parents' high expectations. Never the poet. Or the dreamer. But when I see her, I forget about all that. Something about Natasha makes me think that fate has something much more extraordinary in store—for both of us.**The Universe:** Every moment in our lives has brought us to this single moment. A million futures lie before us. Which one will come true?.

the sun facts information history size formation

May 27th, 2020 - our sun is a normal main sequence g2 star one of more than 100 billion stars in our galaxy the sun is by far the largest object in the solar system it contains more than 99.8 of the total mass of the solar system jupiter contains most of the rest it is often said that the sun is an ordinary star
