L'année 1947 représente, dans l'histoire française, un moment privilégié permettant d'observer l'intersection de deux mouvements évolutifs. Les blocages économiques, la rupture des alliances de guerre, les craquements dans l'empire colonial annoncent la fin d'un monde, celui de la Troisième République ; tandis que les nationalisations, la planification indicative, le primat des ingénieurs annoncent apparemment un renouveau et une modernisation de la France. Mais ceux-ci se situent dans le contexte de la guerre froide qui aiguise la volonté de la France de maintenir une identité nationale menacée par un affrontement qui la dépasse. Un indispensable de l'histoire de la France du XXe siècle..
